

*"Everything But the Plants!"*

# Bulk Materials

**Always in stock and delivered to your job site**

**Sold in "Scoop quantity"- Approximately 1 Cubic yard**

**Walk on Bark**

A fibrous material containing some granular bark and Cambium wood.

This economical material is ideal for pathways and other areas that experience foot traffic, as well provides a pleasant forest fragrance.

**Gorilla Hair**

A fibrous, stringy, dark red-colored product unique in texture and color.

This material works great in a general mulch application, especially in windy areas or sloping terrain.

**50/50 Mix**

50/50 is used to replace or improve poor native soil, raise existing soil level, fill a new planting bed, or fill behind a retaining wall.

**Cedar Mulch**

A clean, screened wood chip material ideal for use as a ground cover or mulch.

Commonly used for flower beds, medians, and freeway projects.

This material is perfect in windy locations.

**Organic Compost**

Use it to amend native soil, add nutrients and organic matter, improve texture, add beneficial bacteria, and stimulate plant growth.

Also great as a Topper before planting grass seed or sod.

**Superior Compost**

Compost with a slightly coarser texture when compared to our Organic Compost.

Use it to create a lighter soil for easier planting in a custom mix, for vegetable bins, or in flower beds.

**Call today for more information, pricing, or to order a custom blend!**
